

Gulf MARINE 100, ATV, and other Fuels containing 16% Iso Butanol

DESCRIPTION

The Gulf racing fuels and off road fuels made to EPA off road specifications with 16% iso butanol are approved for use in sensitive environments and do not contain any ethanol. Instead, Gulf oxygenates its fuels with clean burning iso butanol. Iso butanol is an oxygenate with a lower vapor pressure and higher density, so it resists moisture and eliminates the problems associated with ethanol additives, especially in a marine or vented fuel tank environment. Iso butanol burns with more power than ethanol, thereby creating a fuel that is more powerful than its competitors. There is nothing comparable. Does not contain ethanol.

HEALTH AND SAFETY

This is a flammable liquid and must be kept away from open flames and ignition sources. This product contains tetraethyl lead and other components that are harmful and cause irritation upon contact. Do not ingest or breathe the fuel or its vapors. Wash away any fuel upon contact. Have adequate venting of vapors. Wear eye protection. Empty containers should be properly marked and disposed.

TYPICAL CHARACTERISTICS

R+M/2	93
RVP	7.8
Oxygen Vol%	3.5
Specific Gravity	0.78
Color	Yellow
