

# Legend 100 LL (low lead)

## DESCRIPTION

Gulf Legend 100 LL was developed to offer a more up-to-date racing fuel to replace use of Aviation Gasoline (100 Low Lead). Aviation Gasoline was originally developed to power airplanes designed to run at static throttle less than 2000 RPM and no sharp or continuous changes in throttle.

Gulf Legend 100 LL offers better throttle response by using the latest "tight burn" gasoline technology, which increases the flame speed while retaining the same lead content as Aviation Gasoline.

## HEALTH AND SAFETY

This is a flammable liquid and must be kept away from open flames and ignition sources. This product contains tetraethyl lead and other components that are harmful and cause irritation upon contact. Do not ingest or breathe the fuel or its vapors. Wash away any fuel upon contact. Have adequate venting of vapors. Wear eye protection. Empty containers should be properly marked and disposed.

## TYPICAL CHARACTERISTICS

<b>R+M/2</b>	<b>104</b>
<b>RVP</b>	<b>6.48</b>
<b>Oxygen Vol%</b>	<b>0</b>
<b>Specific Gravity</b>	<b>0.714</b>
<b>Color</b>	<b>Light Blue</b>
